

Ban Suk Jai Preschool Program

The program that we are currently starting has been designed specifically for Ban Suk Jai. The aim of the program is to actively engage children in an age appropriate learning environment. Each of the children involved in the program are living at Ban Suk Jai Children's home and are between the ages of 9 months and 4 years old.

Currently each session involves music, dramatic play, general play, puzzles, a craft activity and reading. These activities are limited by the resources that are available to us currently at the centre. We are in the very early days of the program (we have been running for 8 weeks) so there is a lot of room for development.

There has been a noticeable improvement in the children's fine motor skills already. They are enjoying the program and are engaging in each of the areas. We are hoping to be able

to expand the program and what we are able to offer. Thus equipping these children with practical life skills while having lots of fun!

If you would like more information about our preschool program please contact us at tracey@bansukjai.org
